## LPS Begins Abridged Cataloging

At its recent meeting, the Depository Library Council recommended that LPS proceed with its plan to implement abridged cataloging for two categories of publications. These are the two lowest-priority categories in the Cataloging Branch: technical reports, and publications which are not distributed to depository libraries.

The LPS Cataloging Branch is in a position to take quick action on the Council's recommendation. Users of documents cataloging will benefit by increased bibliographic control for documents which would otherwise not be cataloged by GPO. LPS' use of abridged cataloging will provide timely and reasonably comprehensive cataloging for these publications.

The GPO abridged cataloging proposal is designed to significantly reduce the complexity of cataloging, while still exceeding all applicable national standards and network guidelines. Abridged cataloging will initially be applied to monographic publications, following a plan similar to the draft version printed in Administrative Notes, v.11, #4, with the addition of the series and technical report numbers. LPS expects to catalog an additional 250-300 publications per month using this approach.

LPS' implementation of abridged cataloging does not eliminate other options which may, in the future, prove useful in meeting the goals of improving the Cataloging and Indexing Program. LPS stands ready to participate in other efforts which will enhance our ability to deliver timely and comprehensive cataloging, but abridged cataloging represents the best available approach at this time.

Abridged cataloging will result in immediate improvements in public access to Government publications; the records meet all applicable standards; it can be implemented without a lengthy development effort, and it can be accomplished using existing resources. GPO's first abridged cataloging records will appear in the September issue of the Monthly Catalog.
